

PAN P.G.P
PROJECTS MANAGEMENT SERVICES

PARTNERING FOR LONG-TERM PROJECT SUCCESS

FOUNDER MESSAGE

Project, Program and Portfolio Management practices are increasingly becoming crucial to any organization looking to sustain, grow and remain differentiated in today's aggressive competition. Project Management specialized firms provide great assistance to companies through professional Project, Program and Portfolio Management services extending from feasibility assessment to operations.

Eng. Mohamed Mahdi Abdalla
Founder/SR Consultant

With more than 20 years average experience in complex international projects, PAN consultants have the ability to help Clients through the whole project lifecycle with tailored best Project Management practices.

Engineering, Construction, Real Estate, Oil & Gas, Power, Renewable Energy, Mining, Agriculture, Telecommunication and IT are areas where PAN consultants have the knowledge and experience to support in creating effective and efficient project value systems and delivering benefits to Clients. PAN can help companies increase their Project Management capabilities through in depth SMART partnerships.

PAN's approach heavily depends on developing practical systems through tailoring of processes and standards that fit the specific needs of the customer without gaps or redundant paperwork.

Integration of Project Management systems with HR, Finance, and Procurement is a real challenge that PAN consultants are specialized in.

We, in PAN, value our customers and their expectations; we consider exceeding those expectations the foundation for creating long-term and SMART business relationships.

It is worth highlighting that the intention of this document is not to market or sell the consultancy services of PAN, since all specialized Project Management firms have the same or even more capabilities but the intention is to highlight the importance of emerging Project Management services and how these services can help companies achieve their business objectives.

ABOUT US

At PAN, we specialize in delivering integrated support services in Project, Program and Portfolio Management (PPPM) to organizations operating in the oil and gas and road construction sectors. We empower our clients to manage complex projects with confidence by embedding structured systems, controls and expert guidance across the full project lifecycle from concept to completion. Whether through co-located teams or virtual collaboration, PAN provides strategic and operational support in areas such as project governance, execution planning, cost control, procurement, contract administration, quality assurance and project reporting. We understand that projects in energy and infrastructure demand a high level of precision, compliance and coordination. That is why we tailor our solutions to the unique technical and regulatory requirements of each project, ensuring seamless integration, measurable results and long-term value.

To be the Customers' first choice in provision of Project, Program and Portfolio Management consultancy and development services.

At PAN, we deliver tailored PPPM solutions to help oil & gas and road construction clients achieve strategic goals through structured systems, skilled teams, and value-driven project execution.

PAN PGP STRUCTURE

QUALITY POLICY

The objective of PAN PGP Quality Management System is to support the effective, efficient and consistent implementation of PAN PGP tasks. PAN PGP Quality system is in line with the requirements of ISO 9001, ISO 21500 and Project Management relevant standards. Consistent Implementation of this Quality Management System provides PAN PGP management with reasonable assurance that Client requirements are being met

PAN PGP Management is always committed to:

- Continuously satisfy Client requirements.
- Develop, implement, operate and continuously improve the Quality Management System.
- Always adhere to Professional Responsibility codes when conducting works and rising Project Management capabilities of related stakeholders whenever possible.
- Ensure competent and well trained human resources are available to carry out PAN PGP tasks within budget and in timely manner.
- Promote commitment and excellence culture among all PAN PGP workforces.
- Provide safe and healthy working environment. It remains the responsibility of PAN PGP Management to ensure this

Quality Policy is cascaded to all departments and that all PAN PGP staff and Partners are well aware of their responsibilities towards Quality.

Chairman, BOD

HEALTH, SAFETY AND ENVIRONMENT (HSE) POLICY

PAN PGP prioritizes safety, health, and environmental protection across all operations. By following strict HSE procedures and encouraging ownership at every level, PAN PGP aims to prevent incidents and minimize risks. Success depends on the active participation of all employees and project stakeholders.

Following objectives shall be set for PAN PGP internal works and, whenever possible, set as targets for any participating Project stakeholder (Consultant, Contractor or Subcontractor):

- Development of clear HSE Plans, detailed HSE & Work Procedures and deployment of competent HSE Personnel shall be imposed as a contractual requirement as necessary and applicable.
- All human resources to be aware of and well trained on HSE requirements and plan their tasks accordingly.
- Adopting a "Zero" target for all critical HSE indicators (Lost time injuries LTI, Fatality, acute illness, Environmental damage, etc)
- Setting of performance measures and reporting requirements to control above objectives. It remains the responsibility of PAN PGP Management to ensure this HSE Policy is cascaded to all departments and that all PAN PGP staff and Partners are well aware of their responsibilities towards HSE.
